

## **ARTIST'S STATEMENT on series: "VISUAL DIARY"**

The intention of this series is to convey my insecurities and emotions that I find difficult to verbalize. I attempt to connect to the viewer by calling upon emotions that most everyone feels.

I aim to portray these insecurities and emotions in my artwork because I find art centered on these subjects to be most interesting and widely understandable as far as conceptual ideas go. I connect to visuals resembling human forms or other living creatures, and am inspired by their forms and feelings. While the act of doodling is heavily associated with immaturity, I find that this is when I think most clearly.
